

## Cardiovascular Medicine: An Overview

London, UK  
17<sup>th</sup>–18<sup>th</sup> November 2010

### Description

This course will provide delegates with a review of current treatment regimes and guidelines in selected areas of cardiovascular medicine. Participants will have the opportunity to learn how cardiovascular clinical trial results influence prescribing. Our experienced speakers will discuss the strengths, limitations, and the actual and/or potential impact, of key clinical trials on prescribing practice. Patient presentations and treatment algorithms will provide worked examples to reinforce the lecture content.

Detailed consideration will be given to a number of disease areas, including dyslipidaemias, myocardial infarction (MI), heart failure and vascular disease. Clinical trials investigating current treatments for these diseases, including statins, ACE inhibitors, beta-blockers and anti-platelet therapy, will be analysed and examples will be drawn from primary and secondary care. The implications of coronary artery disease in diabetes will also be discussed.

The programme will conclude with an overview of the challenge of using the evidence base in developing future strategies for the treatment of cardiovascular disease.

### Who should attend?

This two-day course is suitable for personnel who are new to the area of cardiovascular medicine and for those who are already working in this area and wish to enhance their knowledge from a clinical perspective – individuals working in product management, strategic marketing, research and development, specialist sales, training, medical affairs and pharmacovigilance.

### CPD accreditation:

**Healthcare's** programmes are approved by the Faculty of Pharmaceutical Medicine for CPD accreditation. Details can be supplied on request.

### Topics to be covered include

- ▲ Overview and clarification of terminology and recent changes in management and treatment goals in:
  - MI
  - Acute left ventricular dysfunction and chronic heart failure
  - Peripheral vascular disease and stroke
  - Coronary artery disease and diabetes
- ▲ Patient presentations and algorithms
- ▲ Evidence base – 'Trials to Practice'

### Faculty

#### **Professor Mark Kearney**

Professor of Cardiology  
Leeds General Hospital, Leeds

#### **Dr Robert Sapsford**

Consultant Cardiologist  
St. James's University Hospital, Leeds

#### **Dr Stephen Wheatcroft**

Consultant Cardiologist  
Leeds General Infirmary, Leeds

## Healthcare Education Services
