

Introduction to Oncology and Chemotherapy

London, UK
25th–26th November 2009

Description:

Delegates attending this course will benefit from an introductory overview of the terminology and classification of cancer and the principle issues in its treatment. Commonly available anti-cancer drugs will be reviewed with emphasis on mode of action, dose intensity and chemotherapy regimes. This will lead on to a detailed study of the range of side effects commonly and uncommonly experienced by people with cancer undergoing chemotherapy treatment. Quality of life issues in terms of overall assessment and result interpretation will also be discussed.

Detailed consideration will be given to the treatment of major tumour types; breast, lung, upper gastrointestinal (GI), colorectal, ovarian and prostate cancer. Each session will be presented by clinicians active in these areas and will focus on overall patient presentation and management, cancer diagnosis and staging. Following these sessions, our experts will lead delegates in interactive group discussions on the key issues relating to effective management of each tumour type.

The limitations of cytotoxic drugs currently available are well known. With this in mind, the course includes in-depth discussion on new drug development and identification of new pharmacological targets of particular interest and value. Clinical trial design issues will also be included.

Who should attend?

Healthcare's courses are designed for both medical and non-medical staff within the pharmaceutical industry. This course is suitable for clinical research, medical information, regulatory affairs, biometrics and strategic marketing personnel.

CPD accreditation:

Healthcare's programmes are approved by the Faculty of Pharmaceutical Medicine for CPD accreditation. Details can be supplied on request.

Topics to be covered include:

- ▲ Cancer: terminology and classification
- ▲ Introduction to anti-cancer drugs
- ▲ Side effects of chemotherapy and radiotherapy
- ▲ New developments in cancer therapy
- ▲ Introduction to the major tumour types; breast, lung, colorectal, skin, ovarian, GI and prostate cancer
- ▲ Clinical trial issues in oncology

Chairmen:

Professor Jim Cassidy
University of Glasgow, UK

Dr Ferry Eskens
Erasmus Medical Center, Rotterdam, The Netherlands

Fee:

The registration fee is £1,775.00 plus VAT/TAXES. This includes lunch and refreshments throughout the day. Accommodation costs are not included.

Delegates can register on-line or by completing the booking form and returning it together with the appropriate payment to **Healthcare Education Services Limited**. Please retain a copy of the booking form for your records. A reduced academic/NHS fee is available – please contact **Healthcare** for details.

Venue/Accommodation:

Details of the venue will be supplied on registration.

Accommodation costs are not included in the course fee. However, **Healthcare** has organised a room allocation for delegates who require overnight accommodation – details of how to book will be provided with registration documentation.
